Objective

Having completed a Master's degree in Educational Technology, it is my goal to pursue a leadership role to implement technology for learning, communication, collaboration, and professional development.

Experience

SD57 Moodle Course Designer **2009-2012**

Course design includes: Biology 11, Biology 12, Jr. Science, Jr. Mathematics. Assisted instructors in creation of Moodle courses, content, development, and use of eLearning strategies.

SD57 Technology Team **2006-2010**

Assisted in the planning of hardware and software deployment, evaluated new technologies, professional development for Key Technology Contacts in SD57, contact liaison for school-based technology teams. Involved in evaluation and allocating grant funding for school technology proposals.

CHSS Technology Chair & Key Technology Contact **2001-2012**

As chair and technology contact, responsible for creating multiyear technology plans, hardware testing, deployment, software evaluation, training and advising, addressing concerns, and leading the technology team in planning and evaluation of strategies. Additionally responsible for drafting grant proposals.

Educator – Sr. Information Technology & Sr. Science **2000-2012**

Instructional experience includes java programming, web & graphic design, yearbook authoring, life sciences, and mathematics.

Education

Masters of Education Technology, UBC **2003-2008**

Graduate of the [MET, Masters of Education Technology Program](#), UBC. Graduate coursework applied in SD57 through instructional design and District Technology roles.

Educational Professional Development Program, UVIC **1996-1998**

Secondary science and mathematics

Bachelor of Science, UVIC **1991-1994**

Major in Biology/Microbiology

Skills

Analytical and experienced in the use, planning, implementation, and professional development of educational & information technology. Grant and committee work, and planning background have resulted in deployment of smartboards, school & district wifi access, eCourse authoring, social media for education, and increased technology access for students.
